	Project Title : Retail Store Stock Inventory Analytics		oject Design Phase I : Problem Jution Fit
Define CS, Fit into CC	1) CUSTOMER SEGMENT(S) The customers of retail store are mostly from middle-class background.	6) CUSTOMER CC The main constraint is money the products sold must be reasonable in their prices.	5) AVAILABLE SOLUTION(S) 1.Transport: To provide delivery services 2.Warehouse: To store stocks.
Focus on J & P, tap into BE	2) JOBS TO BE DONE/ PROBLEMS The major job is to track the stocked goods & the major problem here is out of stock	9) PROBLEM ROOT RC Many customers alter their changes in their decisions due to their wishes in different products.	Behaviour matters here a lot. The sellers must be polite with their customers to sustain their customers
Identify Strong TM & ER	3) TRIGGERS Trigger is the minimum amount of inventory a certain item can have before reorder 4) EMOTIONS The major key of emotion is customer confidence	10)YOUR SOLUTION The foremost solution in any retail store inventory management is to build customer trust and to satisfy their common customers.	8) CHANNELS OF BEHAVIOUR 1.Online: Customers verify their dealers via some online websites 2.Offline: Some customers verify through their neighbors
